

LHM FLUID

Special Automotive Brake Fluid

Product Description:

LHM FLUID is a high performance hydraulic oil , especially developed for the hydraulic brake-power steering- and suspension systems of Citroën and certain other vehicles.

LHM FLUID complies with the latest demands of Citroën.

LHM FLUID has been fortified with additives to withstand oxidation at the high temperatures encountered in the disc braking systems and to protect the system against rust and corrosion. LHM FLUID shows an extreme fluidity at low temperature, realizing immediate response of the systems under all climatological conditions.

LHM FLUID is a one of a kind hydraulic oil comprising of special base stocks and unique additives to obtain an exceptional high and stable Viscosity Index (VI), and a very low pour point.

WARNING:

LHM FLUID should never be used in braking systems other than those described above, where in a BRAKE FLUID DOT 3,4,5,5.1 is prescribed.

Specifications:

Exceeds: ISO 7308, PSA B71 2710 or PSA Company (Citroën, Peugeot)

Property:	Test Method:	Typical Values:
Density @ 15°C	ASTM D4052	840 kg/m ³
Flash Point	ASTM D92	125°C
Pour Point	ASTM D97	-50°C
Kinematic Viscosity @ -40°C	ASTM D445	1200 mm ² /s
Kinematic Viscosity @ 100°C	ASTM D445	6.15 mm ² /s
Viscosity Index	ASTM D2270	320
